

The screenshot shows a web browser window displaying the Oracle Data Provider for .NET page. The browser's address bar shows the URL www.oracle.com/technetwork/topics/dotnet/index-085163.html. The page features the Oracle logo and a navigation menu with links for Products, Solutions, Downloads, Store, Support, Training, and Partners. A search bar is also present. The main content area is titled "Oracle Data Provider for .NET" and includes a sub-header "12c Oracle Data Provider for .NET". The text describes the ODP.NET features, such as optimized ADO.NET data access and advanced Oracle database functionality. A list of technical information links is provided, including data sheets and white papers. A red arrow points to the bottom of the page.

ORACLE **12c** Oracle Data Provider for .NET
DATABASE

Oracle Data Provider for .NET (ODP.NET) features optimized ADO.NET data access to the Oracle database. ODP.NET allows developers to take advantage of advanced Oracle database functionality, including Real Application Clusters, XML DB, and self-updating client caches.

ODP.NET makes using Oracle from .NET more flexible, faster, and more stable. ODP.NET includes many features not found in other .NET drivers, including flexible LOB data types, self-tuning, runtime connection load balancing, fast connection failover, and Advanced Queuing.

Download the latest ODP.NET production release in ODAC 12c Release 4 with support for .NET Framework 4.6; ODP.NET, Managed Driver security, encryption, and Windows installer; and Transaction Guard improvements.

ODP.NET, Managed Driver is 100% .NET code. Developers can deploy a single assembly, side by side with other ODP.NET versions easily in a deployment package smaller than 10 MB.
